

Satisfaction proven by over 90% renewals from WelGard® customers every month!

Well Professionals say:

"I guarantee that customers will get a fast response and quality service, because WelGard® is a smart advocate for their customers."

"This is the best product for families who rely on a well."

Realtors say:

"WelGard® protects my customers against costly repairs; and protecting my customers protects me!"

"WelSett™ gets me to closing faster, and always with less problems."

Customers say:

"One call and I got my water restored within 90 minutes. I thought I would be without water for the weekend."

"With WelGard®, I got a 'lightning-fast' response."

Builders say:

"This completes the new house warranty!"

"This service is the new standard for high quality homes on a well."

Frequently Asked Questions:

Do I need a water analysis and inspection?

Water quality changes frequently. An annual inspection, like an annual physical, helps detect and fix potentially dangerous long term problems.

What is a good well?

No one can tell for certain. And repairs are unpredictable too. Rain or shine, hydrologic changes cause wells to fail regardless of age or yield.

What does a new well cost?

No one can tell you for certain, until the job is complete. New wells and repairs can cost up to \$40,000 - one of the most expensive home systems. The likelihood of a water failure is over 250 times higher than a fire in your home.

How much does WelGard® cost?

Your comprehensive protection plan and Peace of Mind costs less than a cup of coffee per day.
